Review Staff

SUBJECT : Possible Legislation Following Completion  
of SSC and HSC Investigations

1. At a meeting of the ICG on 10 November it was decided that a study should be prepared under DCI auspices relating to possible legislation which would follow completion of the Senate and House Select Committee investigations.

STATINTL 2. Preparation of this study will be a responsibility of my Action Plan Task Group, of which you are members, and I would appreciate your working with  in development of the paper.

3. The ICG was told that a first cut of the paper could be done by Friday, 14 November. Jack will be in touch with you about a meeting on Thursday, out of which could be developed enough of a draft for the task group to comment upon at its meeting at 1500 hours on Friday, 14 November.

4. The study is to address:

a. Legislation the Senate and House Select Committees may recommend;

b. Legislation proposed by the Rockefeller Commission, Murphy Commission, in legal journals, etc. in recent times;

c. Legislation which the DCI and the Intelligence Community consider it would be important to have.

5. The following approach is proposed, with a separate page being used for each identified "legislative topic" (e.g., changing the role of the DCI, an open budget for the CIA, an open budget for the entire Intelligence Community, sources and methods protection, etc.)

6. Each page would be organized as follows:

Topic:

1. Select Committee Position:

a. Senate:

b. House:

c. Position of other Congressional Committees:

2. Published proposals:

a. Rockefeller Commission:

b. Murphy Commission:

c. Other:

3. Recommended DCI position:

7. The immediate task is to identify the various possible topics of legislation. Such a list can be used as a reference for screening of hearing transcripts of the Senate and House Select Committees for any indication of the views of individual Committee members.
